3D-HydrO₂ facial

the ultimate
#FiveStarFacial
☆☆☆☆☆

Why 3D-HydrO₂ facial?

Give your clients the five star treatment with our new multi-technology facial device. Offering the complete facial solution, 3D-HydrO₂ combines the benefits of two of the most sought after facials on the UK market; in one complete, affordable system, plus many more technologies.

- 3D-Hydro Peel
- Deep Cleanse / Exfoliation
- Oxygenation
- Hydration
- Skin Tightening
- Fire and Ice
- Skin Lifting

The seven technologies guarantee a complete prescriptive approach for all your client's needs. Providing extraordinary results to ensure maximum client retention.

As an affordable addition to any salon or clinic, the 3D-HydrO₂ offers a great earning potential, without compromising on technology or specification.

By combining technologies, it is possible to create completely bespoke facial treatments. Or used individually they can provide a more focused and targeted approach. The 3D-HydrO₂ facial device is more than half the price of comparable technologies on the market

1. Hydro Peel / Deep Cleanse uses a combination of three solutions to cleanse and smooth the skin using an AHA based solution. It hydrates and nourishes the skin using an RH-Oligopeptide-1 and Acetyl Hexapeptide base. Bacteria and inflamed skin is improved using a BHA based solution.

2. Exfoliation / Oxygenation creates 'the Bohr effect*', allowing oxygen to be drawn into the skin. The active ingredients used are Kojic Acid and Retinol which result in a hydrating and brightening effect.

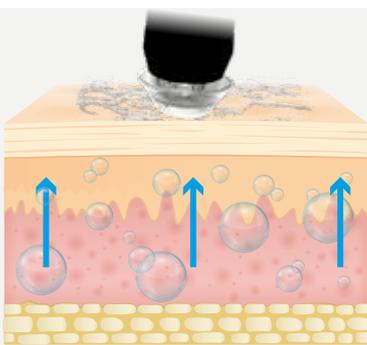

3. The Oxygenation spray creates a venturi effect, breaking down the molecules within the product to encourage skin hydration.

4. Hydration, Ultrasound technology is used for product infusion. This treatment can be used alongside the 3D-Professional Solutions Time Defence Expression skincare range, for anti-ageing and hydration around areas where fine lines and wrinkles are likely to appear. 3D Solutions masks can also be used.

5. Skin Lifting treatment uses electroporation to increase the absorbency of the cell for product penetration. This, in turn, revitalises and 'wakes up' dull and lifeless skin.

6. Skin Tightening Radio Frequency technology is used to increase collagen reproduction in mature skin. Skin Tightening is ideal for incorporating into an anti-ageing facial.

7. Fire and Ice - The 'fire' represents the heat element during treatment. Using this applicator, heat is incorporated into the beginning of the facial protocol to open the pores, increase blood supply, and aid product infusion. The 'Cryo facial' uses cooling technology, chilling the skin down to 5°C. This is used at the end of each facial to decrease the bloody supply, giving a tightening effect, and sealing in the infused products. This also helps to reduce any erythema following treatment.

*How does the platform create the Bohr Effect?

1. A reaction occurs between the capsule and treatment gel causing minute carbon dioxide bubbles on the skin. This increases capillary and blood flow with the increase in carbon dioxide bubbles.

2. The increase in carbon dioxide levels induces a release of oxygen from increased red blood cells, haemoglobin. The results of the level Bohr Effect is an increase in oxygen in the treatment area. The increased metabolism enhances the skins absorption of the active increased in the treatment gel.

3. When oxygen is naturally released to the skin from inside of the body, it results in true oxygenation and it is far more effective than external oxygenation. Oxygenated skin looks fantastic and feels great. Glowing, radiant, youthful, soft, cheeks are plump and pores are smaller. Skin texture is improved.

3D-Professional Solutions skincare can be used in conjunction with any 3D facial treatments, both in salon and at home. This means your clients can continue their skincare regime in between sessions. A brand-new Clear Skin range is now available from 3D-lipo Ltd to accompany the Time Defence and Lightening ranges.

A two-day training course is included with the purchase of the 3D-HydrO₂ facial machine to ensure that therapists get the most out of all of the technologies included with the device. They can carry out the perfect five-star facial, following the detailed 3D protocols and suggested treatment packages.

Competitive Edge

- The 3D-HydrO₂ facial device is more than half the price of comparable technologies on the market
- Combines two of the most desirable facial technologies on the market
- 7 technologies in one affordable device
- New lucrative profit centre
- Low Consumable Costs
- Fantastic Results
- High consumer demand
- Increased Client Retention
- Ongoing Revenue
- Compliments other existing technology
- Excellent adjunct to other treatments
- Opportunities to cross sell
- Customisable to all skin types
- 5 unique facial protocols for brightening, anti-ageing and clear skin
- Sleek Design
- Easily manoeuvrable
- Ergonomic/ easy to use
- Easily marketable

SPECIFICATION

Screen size: 10.4 inch colour screen
Power: 500W
Net Weight: 30kg
Gross Weight: 65kg
Machine Size: 54cm x 40cm x 110cm (w x d x h)
Vacuum Range: Max 680mmHG

Ion Lifting: 500HZ (digital ion lifting)
Multipolar RF: 1MHZ, multipolar (6pol)
Ultrasound: 1MHZ, 2W/cm²
Oxygen Sprayer: 220kpa-440kpa
Cooling & Heating Hand Piece: Cooling: 5-20°C, Heating: 30-42°C
